

FINISH CARE & MAINTENANCE

All PAULL OFFICE furniture is given a high quality finish. The multi-step finishing process starts with careful hand sanding and inspection. A combination of dye stains and wiping stains are used to bring out all of the natural wood grain. A low, VOC catalyzed sealer and low VOC catalyzed lacquer top coat ensures a beautiful, eco-friendly, durable finish.

Wood office furniture will retain its natural beauty for life if proper care is taken. For daily dusting, use a clean, soft, non-abrasive cloth, dampened with water. Always wipe in the direction of the wood grain. Periodic cleaning may be done with any non-solvent based furniture polish. Follow all package directions on the label.

If spills occur, they should be blotted up as quickly as possible. Avoid placing damp objects; beverage glasses, flower pots, etc. or hot items like coffee mugs directly on wood surfaces without the use of a coaster. Consideration should be given to the use of a desk pad.

The use of glass on the worksurface is not recommended as it tends to trap moisture and ultimately will cause harm to the finish.

Care should also be given to avoid exposing the finish to strong sunlight, heater outlets and dampness, as these conditions may cause fading, warpage or other damage to the finish.
